Whitepaper v 2.0

Abstract

Rapid Core (RAPID) is a 3rd generation cryptocurrency that will be community based and aims to have low fees, instant transaction and will be fully transparent, which are key elements of a successful coin. Our ultimate aim is to process secure and fast payments for online based marketplaces in the future. We also decided to have masternodes to encourage decentralization.

„Would people understand the monetary system; we would have a revolution before tomorrow morning “–Henry Ford

„ We need banking, but we don't need banks anymore.”- Bill Gates
(1998)

„Virtual currencies are very promising overall, especially when making payments faster thanks to innovation, safer and more effective. ”
- Ben Bernanke, former US- Federal Reserve Chairman

„Your kids will not know what (cash) money is.”
- Tim Cook, Apple CEO 12.11.2015

„Gold has value because people believe in it, that it has a value. The Bitcoin is built on a fascinating technology and its number is limited. “
- Mike Novogratz (Hedge-Fonds-Manager)

„Bitcoin is a remarkable cryptographic achievement ... The ability to create something that is not duplicable in the digital world has tremendous value. In addition, many people will continue to build great companies. “
-Executive Chairman von Google Eric Schmidt

RAPID CORE PROJECT

A third-generation cryptocurrency combining Proof of Work and Masternode progressing onto Proof of stake

Introduction

We will do with our project, the accessibility and the applicability of enable cryptocurrencies for the masses of the world's population.

We believe blockchain technology and cryptocurrency will be a big part of the future financial world as well as all other industries.

Here are some of our Milestones:

- *Successfully Take Over the Rapid Core Blockchain Project*
 - *New Dev Team*
- *New Rapid Core Team Members (8 Members, 4 different Continents)*
 - *New Github Account with Open Source Code*
 - *Compiled new Wallets*
- *Beginning of January 2019, we had our successful hard fork*
- *Source code parameters changing (Roi Changing, Max Supply etc.)*
- *We launched multiple social media platforms including Discord, Telegram, Twitter, Reddit, Steemit, Facebook and Instagram*
 - *Launched our official Mining-Pools*
- *Hit the 300 Community Members mark on Discord*
 - *And we are just started our story!*

Our focuses are:

Fast

We focus on making Rapid a fast coin which is where you pay a person a specific amount of RAPID and they will get it instantly by using Instant Send technology. This comes handy when you are paying a shop for a cup of coffee or your weekly shopping. This is much faster than Bitcoin where you could be waiting up to an hour for payment to be processed

Transparency

*We focus on making Rapid a transparent and trustful Coin, where we show what we pay for, for example: Listing fees, investments, etc., or development that benefits the Rapid ecosystem, *Some exchanges enforce an NDA before listing, payment would be announced when Rapid is listed. Also everyone can have a look in our Github link to have a look in our Source Code*

Community

We are focus on having Rapid a strong community where everyone gets involved with the future of the coin – for example, volunteering in chatrooms, like Discord or simply just mentioning our name in social media like Twitter, Discord, Facebook, Reddit, Instagram, Steemit. Hiring Community Members for our future platform and use case. Helping the Community Members to create a independent Vendor and successful self-employing income with our platforms. To be a Strong based Community Coin is one of our most important focuses

Proof of Work (PoW)

In Rapid, we utilize a Proof of Work (PoW) consensus to maintain our decentralized ledger. This is carried out by mining in our X11 algorithm to solve blocks, once a new block is solved aka mined it gets added to the blockchain and the miners and Masternodes Holders to rewarded with RAPID coins

Masternode (MN)

Masternodes (MN) are used in conjunction with PoW to maintain and secure the RAPID blockchain Masternodes are utilized to send RAPID instant Payments, Privacy Payments & also to govern our DAO system. The DAO is a self-governed treasury system , 10% of all block rewards are kept back for DAO funding and once a month a “superblock” is created for the DAO. Where the community can make a proposal for funding, whether a proposal is funded or not is determined by the masternodes owners (MNOs) using their masternodes to vote for each proposal.

Rapid Platforms

Our two future Platform will revolutionize the future of all crypto users with our Rapid Core Marketplace Platform and our future RapidSpots Expanded Reality Technology. And to show that it is possible to bring a Cryptocurrency to the offline live of the humans and to show that is important for a 3rd gen cryptocurrency that you have not only another Cryptocurrency with anonymous and fast payments , that you have a strong usecase for the Cryptocurrency to implement a use and unique equivalent for it.

Proof of Stake

Proof-of-Stake will start block height 1 450 001, with our platform together to make a offline in platform cold staking possible and to run the blockchain without the need of miners anymore.

Our new Technical Specifications

Coin Name: Rapid Core

Ticker: RAPID

Algorithm: X11

Block Time: 150 seconds

Confirmations: 6

Block Size: 2 MB (Megabytes)

Premined Supply: 15 000 000 RAPID

(dev team + community don't have control of premine, because

Community Coin Take over)

Max Supply: 500 000 000 RAPID

Masternode Collateral: 450 000 RAPID

Block Rewards breakdown

Block Height	Rewards	Mining	Masternode	Budget
1 - 99 999	750	100	500	deactivated
100 000 - 150 000	550 (100%)	165 (30%)	330 (60%)	55 (10%) (5% to dev team, 5% airdrop to community)
150 001 - 750 000	400	120	240	40
750 001 - 1 450 000	250	75	150	25
After Block 1 450 000 POS will start	Post after ~ 1 year - 1.5 years	POW Ends - POS starts (hard fork)		
1 450 001 - 2 000 000	100	30	60	10
2 000 001 - 2 450 000	72.5	21.75	43.5	7.25
2 450 001 - 2 900 000	45	13.50	27	4.50
2 900 001 + infinity	17.5	5.25	10.5	1.75

Rapid Core Market Place Platform

With our Rapid Core Marketplace Platform we want to bring buyer and seller of products and services from the whole world together

For Sellers:

You can open on our market place a vendor shop. There you can offer all kind of your products and services. For example: Crafted Products, digital products, handwork service (carpenter, plumber etc.) services like a mentoring/ coaching or any kind of freelancer jobs. But you also can sell your homemade products.

You can sell any kind of Legal products, (When its Legal in Germany or Canada) if you want to sell illegal products you will get banned from our RAPID Core Market Place Platform.

*When you open a vendor shop you must pay **monthly** fee in RAPID, which depends on your turnover. If you had no turnover for example in the first month, you don't have to pay any fees. But when you start selling in your vendor shop you must pay fee one month later, after your first selling. You also have an extra Chat room for your shop, there buyers can contact you directly.*

You can choose between two different kinds of vendor shops:

- 1. Local Vendor shop: Here you can offer your products and services only in your country or town!*
- 2. Worldwide Vendor Shop: Here you can offer your products and services worldwide.*
- 3. Premium Vendor Shop: With a lot of useful extra RAPID Services and Features for your Shop to make your daily business more comfortable for you.*

For Buyers:

*There you can buy products and services from your country or from the whole world. You must pay in crypto like RAPID/ BTC. When you buy your stuff, you can choose an extra buyer protection from us. The buyer protection costs **1-3%** fee from your shopping cart. So, you are insured for the entire purchase amount.*

The role of RAPID:

We are developing, hosting, administrate and managing the RAPID Core Market Place Platform. We accompany every purchase and sale. Through us as escrow we release the paid contributions only if the seller has rendered the service to the buyer or he has sent the goods and can document it. Once this is done, we release the sums paid and the seller receives his money.

The time span between: buyer pay the service and the seller receives his money is max. 5- 15 working days. Depends on the countries where the seller and buyer are living. Should one of the two parties fail to perform during the period, the process will be canceled, and both parties will receive their return.

We also offer a buyer protection. The buyer can select these before the purchase. Thus, the entire purchase amount is insured by RAPID Core and if the seller does not deliver, the buyer protection fee is 1-3 % of the purchase price.

Rapid Core Marketplace Platform Community Support Members

Our Support Worker for our Rapid Core Marketplace Platform we are hiring in our Rapid Community. We need from different country and continents some Support Workers for the Rapid Core Marketplace Platform. The Platform Community Members can work from home Office. You can make a apply from your country for this Support Job or get ask from the dev team when we see you are really active in the community.

Our skill requirements that we are expect:

- flexible, trustworthy, able to learn new things, good hearted, motivated, fluent in English and your native language, open, sympatic, creating your working day like you want, full time, spare time, valid passport etc.

When you get in our Rapid Core Platform Support education Program, you will start a 3- 6 months education in our education Program to learn everything you need to work as a Platform Supporter.

The Rapid Core Platform Support education school will look like a Online School, with own User access and different teachers.

After the first months of education program your income will start. You will get a monthly Loan and the Loan will increase every month of education Level. After 3 month you have a test, when you pass the 3 months test. You will come in the 4-6 months education Level where you will have education school and practice work. After you finish all 6 months you will have a final exam and when you pass the final test you can start in the 7th month as an official Rapid Core Marketplace Platform Support Worker for the Rapid Core Blockchain project with a weekly Loan in BTC or Rapid.

Rapid Core Market Place Platform income:

Adjust cost/ Set up fee (only Rapid Core Coins) depending on the country where the user lives and for the duration (days, week, month) you host your products/ services on the Rapid Core Marketplace Platform.

and

- 1% of successful trading fee from selling price of the products*
- 3% use of the RAPID Buyer Protection Service*
- Premium Vendor Shop Features*

Rapid Market Place income split:

- 20 % Dev team and equipment*
- 10 % Back up fund*
- 17.5 % Reinvest*
- 7.5 % IT Security*
- 5 % Bounties for white hackers, to help fully optimize the Rapid Core Marketplace platform*
- 10 % Rapid Crowdfunding for Vendor Shop Start Ups, whole over the globe*
- 30 % Invest in renewable energy fields and social entrepreneur projects*

Another Marketplace feature is our crowdfunding platform

With our additional crowdfunding platform, users can post their Vendor Shop Projects which they need funding for to start their business.

Everyone from the RAPID Core community can vote for the projects once per funding round. The RAPID Masternode holders receive for each MN they are holding extra votes. (Detailed Voting System will announce next months)

The projects (3-4), which receives the most votes at the end of a voting round, are the winners of the respective crowdfunding round.

Each RAPID Core community member can donate additional Rapid or BTC to his "Favorite Project", regardless of the amount. In addition, we RAPID Core Blockchain Project, have included in our revenue plan a crowdfunding account equal to 10 % of total revenue. Every months, we distribute this 10% to the crowdfunding "winners".

The projects must all have a short business plan and a roadmap to participate in the voting. The winner will not be paid the full amount at once, but after the progress of the project step by step. We want to prevent certain "exit-scams".

Voting System

The exact detail of our Voting System and how it exactly works and how much votes you can get and what you can do with the votes will follow the next months.

Rapid Core Expanded Reality Technology

(nearly the same technology like Nintendo used for the Pokemon Go Game, but we will use this technology with a totally different Use case)

Our philosophy about to use of a Expanded Reality Technology of our RAPID Core Blockchain Projects is to connect through the Rapid Core Marketplace Platform and the RapidSpots the people in the real world together and bringing the use of a Crypto Coin to the Offline Live of the people. (this Goal is rare for a Cryptocurrency).

The real world will be expanded with helpful and very useful digital extra features and Unique Tools via the RapidSpots.

Let's bring Rapid to the streets!!

Will be developing a App for Android, IOS and a Program for Windows/ Linux and Apple.

RapidSpots

RapidSpot is a digital branch dealing with different types of shops, restaurants, companies, government and the most important one, foundations and they all can rent a RapidSpot within all of the Tools and Functions of the RAPID Expanded Reality technology. The RapidSpot will be digitally positioned exactly where the store is located on the Map via GPS tracking and are displayed in the Rapid Expanded Reality App. So to speak, precisely positioned in the digital position where the business is located and physically digitally stored and utilized on the respective shop, restaurant, company and foundation etc.

(where RapidSpot is rent, range radius 5-20 meters; little future Spoiler from one of your devs ;) you can find rare unique RapidSpots whole over the world (Secret Rapid Core Spots, with different unique secret mystic rewards for the finder with different kind of cooldowns; !Important! range 10- 50/100 centimeters; ~ 0.1 – 0.5/1 meters)

The people at the RapidSpots can use many premium features for/in the Rapid Core Marketplace Platform for free via the combination of the Rapid Core Expanded Reality App and the RapidSpots:

- Fairy free fee trading for Buyer and Seller on the Rapid Core Marketplace Platform.*
- The use of the Buyer Protection function for free (instead of paying 1% - 3 % fee) on the RAPID Core Market Place.*
- using all the Premium Vendor Shop functions for free on the RAPID Core Marketplace Platform
(believe me will be really helpful for Vendor Shop Owners).*

Also you can use on/ near a RapidSpot many really useful RapidSpot Plug Ins

(Expanded Reality functions to expand yourself in the reality with useful Tools and Features with a background digital reality on the real reality, like an Upgrade/ Tuning for your Soul, Mind and Body on a decentralized blockchain way ;)

!Important!

The Rapid Expanded Reality Plug Ins and fee free using of the RAPID Core Market Place Platform and premium functions is only useable in/ near a RapidSpot.

How can stores, shops, companies, restaurants, foundations etc increase their profits with renting a RapidSpot.

- Revenues by extra customers who are only there because of the RapidSpot.

- earning from all fees from the different Rapid Expanded Reality Plug IN functions.

like

Rapidex Dex Exchange fees, automic swap fees, renting hash rate fee, Coupon Selling fee etc.

- earning from the Plug Ins selling fee when Plug Ins or Special Plug Ins are buying from visitors on the RapidSpot in the Rapid Plug Ins Store.

- earning from the reward in Rapid or BTC when a visitor is refilling his 1-3 Plug Ins carry ability with everyone is able to carry Plug Ins per mobile on the Rapid Core Expanded Reality App without being near a RapidSpot, only refillable on/ near a RapidSpots.

(has a cooldown until the carry ability is empty and you have to refill again, you can refill for free when you have enough walking points on the App, which counts your move ability and walking motivation; counts your foot steps you make each day and gives you everyday walking points).

- Earning from the transaction fee for the BTC Lightning Network Open Ports Plug IN which visitors of the RapidSpot can use.

- more earning option will come soon.

Transparence User (enable App function)

You can enable or disable the Transparence User Function in your RapidSpot App. When you have enable it, your RAPID Core Market Place User profile and information's are showing open to the other Users at a RapidSpot. (dont worry you can mark which information's you would like to make transparence) That means you can see other profiles from other Users on the RapidSpots what they are selling, which services they are offering, what they are searching etc, .

You can do that without knowing who or where the other person/ community Member sit or be or look at the RapidSpot where you are too, but you can view the different profiles and write directly with the other Users via RapidSpot "rapidnet" Plug In and other Users can see you and write with you. (Encrypted, anonymous chat connection RapidSpot rapidnet Plug In).

Some Expanded Reality Plug INs functions, exsamples and definitions

Plug-INS definition

RapidSpot Plug-Ins are different expanded reality features and tools that you can use at a RapidSpot, the combination of your Plug-In feature and tools you decide which everyone wants to use can every User customize configurate in

their app. Near a RapidSpot you can use up to 9-20 different Plug Ins only for paying a little fee. Basic Plug Ins are nearly for free to use, only little using service fee.

RapidSpot Expanded Reality App has an integrated walking counter to count your steps a day to give you walking points with which you can refill your Plug Ins which you like to take mobile with you in your App without being on a RapidSpot, or you can refill it for Rapid or BTC when you are at a RapidSpot.

RapidSpot some Plug Ins example :

Plug INs (Expanded Reality; Function/ Tools):

- Rapid Marketplace Platform using through the RapidSpot (free fee Marketplace using/ trading/ selling/ buying, free Buyer protection fee, free use of Vendor Shop Premium features)
- Rapidex DEXExchanger/ automatic swaps (different automatic swaps every week on different locations on earth)
- BTC Lightning Network Port
- Plug INs Developer Room
- Plug INs Store
- business trade protection service
- buyer protection feature
- Coupon exchange for Rapid or BTC from local/regional suppliers/stores/shops etc
- „Rapidhour“
- like qnet direct anonymous chat communications (rapidnet)
- Coin Calculator/ mining calculator
- renting hashrate
- Masternode monitoring
- use Rapid MN Hosting Service
- use some useful bots/ KIs for free

more will coming Soon

Plug Ins Developer Room

Every Community Member can create/ code own RapidSpots Plug In ideas in our Plug Ins Developer room. When you coded a Rapid Plug In and the creation process is finish you can send it to our test a quality control port. When your Plug In successfully pass our test, you are allowed to sell your Plug in for Rapid or BTC in our Rapid Plug IN Store. Or it's up to you to give your Plug In for free to the Rapid Community regional/ national or international.

!!Important!!

The Rapid Plug Ins Developer Room you only can use near a RapidSpot

Plug Ins Store

In the Rapid Expanded Reality Plug Ins Store you can buy different kind of Plug-Ins and you can buy there community member made Plug Ins. Also you can restore your Plug-Ins there (total free).

The Basic Plug Ins are complete free and for everyone usable near a RapidSpot.

!!Important!!

The Rapid Plug Ins Store you only can use near a RapidSpot

Plug Ins:

Rapidex (DEXExchanger)

This is a Decentralized Exchanger you can choose as a Plugin when you are in a area of a RapidSpot, which you can trade via your Wallets directly through the Rapidex with Rapid/ into a lot of different Cryptocurrencies. Future Offline rapid staking ability.

List your Coin, listing your Coin is cheap when you pay in rapid the Listing fees.

still you need to accept a serious and quality control from us to avoid scammers.

More detail explanations from the different Plug Ins will come every 2- 3 week.

!!Math calculation example of the profit potential of rent RapidSpot for the Rapid Core Blockchain Project!!

Simple math example of the potential of rentability and usability of this kind of idea RapidSpot Expanded Reality with RapidSpots and rapid marketplace platform combination as a main usecase for the Rapid Core blockchain project:

Over 7 000 000 000 billions humans living on Earth, and when one RapidSpot Cost depends on the country 10 €/CAD or btc to 100 €/CAD or 30%/Rapid/70%/BTC each months to rent a RapidSpot.
(Countries with low brutto inland product can get the RapidSpots for free via Community voting.)

Calculation example: When only **1 %** of the **7 000 000 000 billions humans** on earth using crypto currencies (believe me its more :P) but ;)

100% = 7 000 000 000 humans
1 % = 70 000 000 humans

That 1 % is 70 000 000 million humans

when 70 000 000 Million humans using cryptocurrencies and from this 1% only 5% are renting our RapidSpot for an whole average of 20 €/CAD or in 30%/Rapid/70%/BTC each months.

The result of this calculation is a profit of:

100% = 70 000 000 humans
5 % = 3 500 000 humans

3 500 000 humans/rent RapidSpot x average 20 €/ each months

3 500 000 x 20 € = 70 000 000 € each months (~ 840 000 000 € each year)

This is a unbelievable profit potential with the RapidSpots to get a **earning of 70 000 000 €** in cryptocurrencies or fiat each months!!
and **plus** the earning with the Rapid Core Market Place Platform.

RapidSpot revenue splitting

- **10 %** dev team + Rapid Core Team for motivation
(calculation example 7 000 000 €/month).
- **20 %** investing in land, forest, swamps etc to open Rapid Core National Parks around the world
(calculation example 14 000 000\$/ month).
- **10 %** for building Rapid Core schools to educate teachers around the world and building Rapid Core schools for children's and hiring the own educated teachers to teach the children's in the Rapid Core schools. All on german standarts, the teachers will get a monthly Loan
(calculation example 7 000 000 €/ month)
- **10 %** IT security + developing Secure standards
(calculation example 7 000 000 €/ month)
- **15 %** Backup Fund
(calculation example 13 500 000 €/ month)
- **5 %** Rewards for White Hacking
(calculation example 3 500 000 €/ month)
- **10 %** for the Crowdfunding for funding Rapid Core Marketplace Platform Vendor Shop start-ups
(calculation example 7 000 000 €/ month)
- **20 %** reinvest in the RAPID Core Blockchain Project
(calculation example 14 000 000 €)

That's amazing Rapid Core Community! unbelievable potential!! Lets step to the 3.5 gen transforming

Community Representatives

The Community Representative are elected people by the community that help advertise Rapid in their own country and talk with the local community online, but their main job is to make the quality control for all RapidSpots in their Country with fix Loan.

This allows the community to have a decentralized quality controlling for

the RapidSpots.

We plan to make a separate website for the election page and start off small by having selected countries and trial it.

We intend to charge 50 Rapid and force user registration for the elections as an attempt to stop duplicate votes.

The election season will happen at the end of the representative's term length and they can try for a re-election as a candidate.

Election season windows:

Window 1: 1 week for candidates to register their interest in running for the Community Representative for their own country. The candidates will go under checks to prevent any suspicious candidates from running.

Window 2: 1 week for candidates to advertise themselves and talk to the community to why they are the best person to vote for.

Window 3: 2-week window for the community to vote for their preferred candidate.

Window 4: 1-week window for the official team to verify the results of winning candidates and provide them with information and announce the winning candidate as the "Community Representative of *country*"

Creating a Canadian company and Germany Foundation

Starting to get in contact with Lawyers in Canada and Germany to start the process of figuring out the best company combination to integrate the Rapid Core Blockchain Project in a legal and official company form.

We prefer a Canadian company and German Foundation combination

Canada company because:

- has fully cheap electricity for green mining since 1965*
- One of the openest and most understanding crypto and Blockchain Knowledge*
- One of the best crypto laws in the world*

German foundation because:

- Only one point germany has the best foundation Law in the world*
- Open a „Hybridstiftung“ the first and only crypto company which opened this exotic type of foundation in Germany was doing from IOTA 2017 in Berlin*

Wallet GUI upgrade and in Wallet aplikations

**Explanation for the Rapid Core Wallet GUI Upgrad and In Wallet
applications will come the next months**

Roadmap Update

Q1 2019

Community Coin Take Over

New Core Dev Team

Successfully hardforked

Starting Bounty Program

Start Airdrops to Community

Q2 2019

New Whitepaper v 2.0.0 public release

New Rapid Core Website public release

Show first Proto Merchandise Designs

Start Nodeeasy.com listing

Starting Masternode and Shared MN Hosting Service to community

Q3 2019

Improve decentralization

Public release Masternode Setup Guides

Listing on a Masternode calculation site

Source Code update

First Exchange Listing

Q4 2019

IOS Rapid Wallet release

Start Social Media Campaign (1)

Finishing designing Merchandise

Open Merchandise Shop

Setup simplified Rapid Marketplace platform

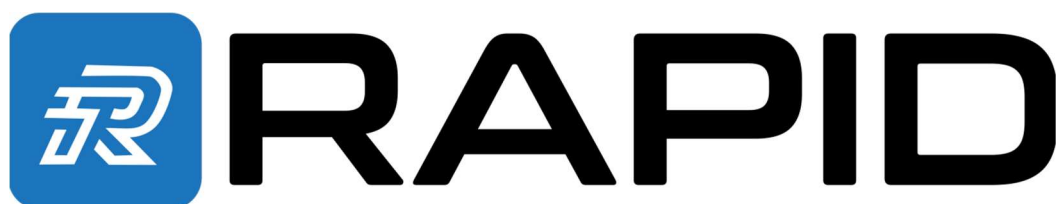

Youtube documentation videos for showing the community a two weekly progression status

Q1 2020

Coinmarketcap Listing

RAPID Marketplace Platform 180 accesses for community Members to test the Alpha version of the Rapid Marketplace Platform

Announce the vote system combination and different votes you can get when (hold Rapid, using platform, holding Rapid Masternode, etc)

Q2 2020

Mobile Wallet available for IOS and Android

Open Rapid Alpha Vendor Shop Option

Open community Rapid Marketplace review section on our website to improve our platform with opinions from the community

Starting get in contact with lawyers to figure out the best company combination to integrate the Rapid Core Blockchain Project in a legal and official company form

Develop start of the Rapid Core Expanded Reality (RapidSpots)

Q3 2020

Overwork community Rapid marketplace review and opinions

Fix and overwork Rapid marketplace platform

After official Rapid Core Blockchain company is funded

Rapid Core marketplace platform official public beta release

Open Vendor function into the Rapid platform

Start Social Media Campaign (2)

Start setup social entrepreneur Projects platform

Open Crowdfunding Option for start up Vendor Shops

Community Members can create their crowdfunded Vendor Project

Via a 3 weekly voting the first 3 Projects get funded and can open their Vendor Shop

Q4 2020

Start setup social entrepreneur Projects platform

Open social entrepreneur platform and integrate into Rapid platform

Start voting for your Project

Investing in social entrepreneur Projects

Start investing in renewable energy fields

Start searching Support team Members out of the Community for Rapid Marketplace platform

*Platform Supporter get a training and after successful consist training they can start as a Rapid platform Support worker from all over the world with a **weekly loan***

Start developing Rapid Expanded Reality function (RapidSpots)

Q1 2021

Hardfork to PoS/MN and new Wallet Design

Integrate Rapid Marketplace Platform as a inWallet application into the Rapid Core wallet

Q2 2021

Upgrade Android and IOS Wallet to the new Wallet functions and app PoS activation

Concentrate on optimize and perfectly overwork Rapid Marketplace platform

Q3 2021

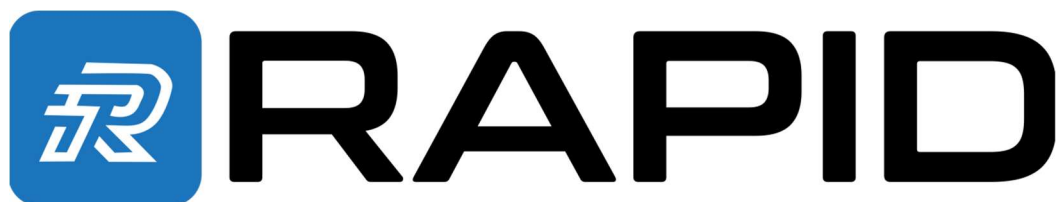

Start open Rapid Expanded Reality function (RapidSpots) Alpha App version

Concentrate on optimize and perfectly overwork Rapid Marketplace platform

Q4 2021

Open Rapid Core Expanded Reality functions Source Code

Big community bounties for helping fixing bugs

Q1 2022:

*Open Source Codes for RapidSpots Plugins **developer room***

Open RapidSpots community coded selling Rapid Plug In Store

Fix and overwork Rapid Expanded Reality function (RapidSpots)

Q2 2022:

Fix and overwork Rapid Expanded Reality function (RapidSpots)

Public beta release Rapid Expanded Reality function (RapidSpots)

Q3 2022:

*Starting developing customade Blockchain what is optimize
designed for the usecase of the Rapid Core Blockchain Project*
